International application No. PCT/EP2004/009216

17.08.2004

18.08.2003

Applicant

VRIJE UNIVERSITEIT BRUSSEL et al.

- 1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary report on patentability and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/EP2004/009216

Re Item V

IAP20 Ros'd FCT.FTO 17 FEB 2006

Reference is made to the following documents:

D1: EP-A-0 384 540 (SHELL INTERNATIONALE RESEARCH MAATSCHAPPIJ

B.V) 29 August 1990 (1990-08-29)

D2: US-A-6 069 289 (DANDEKAR ET AL) 30 May 2000 (2000-05-30)

D3: US-B1-6 281 406 (CAIN JOHN J) 28 August 2001 (2001-08-28)

The present application is directed to a method for separating mono-branched hydrocarbons e.g. from a mixture of hydrocarbons comprising bringing said mixture into contact with at least one adsorbent, thereby allowing the selective adsorption of said mono-branched hydrocarbons by said adsorbent, and desorbing said mono-branched hydrocarbons from said adsorbent, thereby allowing to selectively separate said mono-branched hydrocarbons.

D1 and D2 are considered to represent the closest prior art (cf. passages indicated in the ISR) and disclose the separation of hexane, 3-methylpentane and 2,3-dimethylbutane (D1) and 2,2-dimethylbutane, 2,3-dimethylbutane, 2-methylpentane and hexane (D2) using zeolitic adsorption materials.

Thus, the matter of claims 1-10 12-15 and 17-22 is not novel in view of D1 and D2. The matter of claims 23 is disclosed in D3 (cf. passages indicated in the ISR) and, therefore, the matter of claims 23 is also not novel in the light of D3.

However, the use of the special zeolite MCM-22 (claim 11) in a method for separating mono-branched hydrocarbons as well as the special ratio (claim 16) mono-branched/linear alkanes = 1/1 is not disclosed in the prior art.

However, the matter of claim 16 does not show any technical effect on which an inventive step can be based.
